CP-HDTP/HDTP

Pre−Terminated Ultra−Low Skew UTP (Unshielded Twisted Pair) Plenum Cable

Kramer's CP−HDTP/HDTP pre−terminated unshielded twisted pair (UTP) plenum cable is designed for long distance video transmission over CAT 5/5e twisted pair cable applications. It is ideal for Kramer's Cobra Twisted Pair™ series transmitter/receiver sets. CP−HDTP resembles typical CAT 5/5e cable, but with internal components optimized for transmission of video/audio signals rather than high−speed data.

FEATURES

- Quality Construction - CP−HDTP cables are durable and flexible CMP/CL2P rated, and terminated with high−quality RJ−45 connectors with snag protection boots. Note that the boots can slide out of the way when easier access to the release tab is desired.
- Precision Engineered - Four pairs of solid 23AWG copper are twisted at the same ratio so the actual length of each is identical. Note that these cables are not suited for high−speed data or network applications.
- Varied Selection of Lengths - Available in versions of 7.6 to 91.4m (25, 35, 50, 75, 100, 150, 200 and 300ft).
